

THE SCHOOL VEGETABLE GARDEN

IC Rita Levi-Montalcini
Bagnolo Cr. Italy
school year 2019-2020

eTwinning project “YES, WE CAN!”

The project

Bagnolo Cremasco School has an area in its surrounding garden dedicated to a vegetable garden kept in collaboration with an Agricultural High School in Crema and with the help of grandparents. This project started three years ago and every Primary School class takes care of part of it. In autumn they prepare the large round vases where in spring they put seeds, water them regularly and by the end of the school year they can see their plants growing. It is also an inclusive project. The Secondary school has also a round vase. There are several fine herbs like basil, sage, rosemary but also tomatoes, peppers and other vegetables like salad. Each class decides what to grow.

Unfortunately this year, because of the Coronavirus lockdown, we could not do the spring step and pick our vegetables.

This is our school vegetable garden...

...let's plant it!

Our vegetable gardens

We live in a rural area so it is not uncommon that houses have a garden and a vegetable garden, too. Here are some pictures of project pupils' vegetable gardens that they look after with parents or grandparents. And girls are very active, too.
